## Journey Back to Oz

August marks a celebration for fans of *The Wizard of Oz*—the 86th anniversary of the beloved film's release on August 25, 1939. In addition, the 125th birthday of the classic book, first published in May 1900, was celebrated earlier this year. Whether you first met Dorothy and Toto on the page or the silver screen, their journey down the Yellow Brick Road continues to charm audiences of all ages.

L. Frank Baum's *The Wonderful Wizard of Oz* was a sensation from the start, quickly becoming a staple in American children's literature. Over the decades, the story has inspired sequels, stage plays, and, most famously, the 1939 MGM film starring Judy Garland as Dorothy. The film dazzled audiences with its Technicolor magic, memorable songs, and a cast of unforgettable characters: Tin

Man, Scarecrow, Cowardly Lion, and Toto (who was played by a female dog named Terry).

The book and the movie differ in small ways—Dorothy's slippers are silver in the book but ruby red in the film, for example—but both deliver the same heartwarming message about (cont. on p. 4)

## Black Cats in a New Light

Does a shiver run down your spine when a black cat crosses your path? Do you instantly think of bad luck or witches on broomsticks when you see one?

Black Cat Appreciation Day on August 17 is your chance to revise your

superstitious notions. For example, in Scotland, Great Britain, and Japan, black cats are considered good luck and signs of prosperity. Some even believe that a woman who owns a black cat will have many suitors. Long ago, sailors

would choose a black cat as their ship's cat to protect their ship and bring good fortune.

Shelters posting black cats for adoption offer another reason to appreciate black cats: they go well with any outfit.
